SIMATS ENGINEERING (SAVEETHA SCHOOL OF ENGINEERING)

Department of Computer Science and Engineering

ASSESSMENT TOOL 2 –EXPERIMENTATION

Course Code:	ITA03	**Course Title:**	Mobile computing
CO Assessed:	CO2	**Assessment:**	Assessment Tool 2 – EXPERIMENTATION
Weightage:	30% of CIA	**Total Marks:**	100 marks
CO2 Statement:	*Compare mobile communication technologies, including multiple access techniques and network evolution, based on performance and applications.*		
Student Name:	S.B. Sayed Basha	**Reg. No.:**	192372357
Section / Batch:	2023/ CSE(AI)	**Date:**	23/10/2026

Code of Conduct

I S.B - Sayed Basha (192372357) *(Name / Reg. No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.*

Signature of the Student: Sayed Basha

Instructions

- This test contains FIVE questions.
- Duration: 60 minutes (homework)

Faculty In-charge	Course Coordinator	Head of Department
Dr. Terrance Fredrick Fredranz	Dr. Terrance Fredrick Fredranz	Dr. Sasi Rekha

90/100

AIM: To design a figma prototype showing Mobile Ip communication in the Home Network and foreign Network.

Algorithm:

1. Open figma and create a new file
2. Draw Home Network and foreign Network
3. Add MN, HA, FA, CN and COA
4. Connect components using arrow
5. show registrations and packet tarling
6. Connect frames in prototype mode.
7. preview and verify the design.

Figma Diagram:

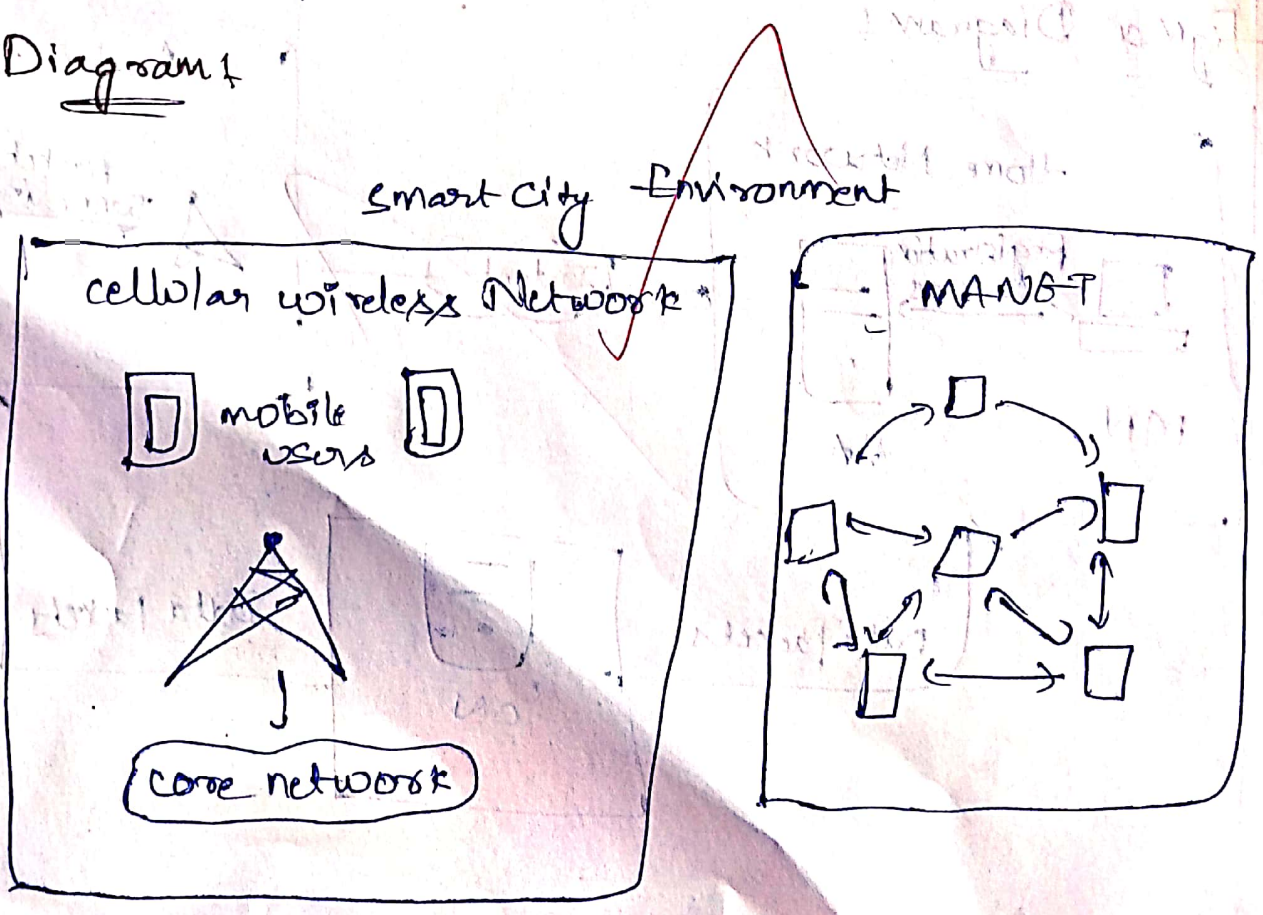

Results: The Mobile Ip communication workflow was designed and visualized using figma.

a) **Aim:** To design and compare cellular wireless N and MANET using figma.

Algorithm:

1. open figma and create a new file.
2. create a Smart city frame
3. Draw the cellular network architecture
4. Add user, Cell towers and core Network.
5. Draw the MANET architecture.
6. Add advantages and limitations.
7. Connect frames in prototype mode.
8. preview the comparison.

Figma Diagram:

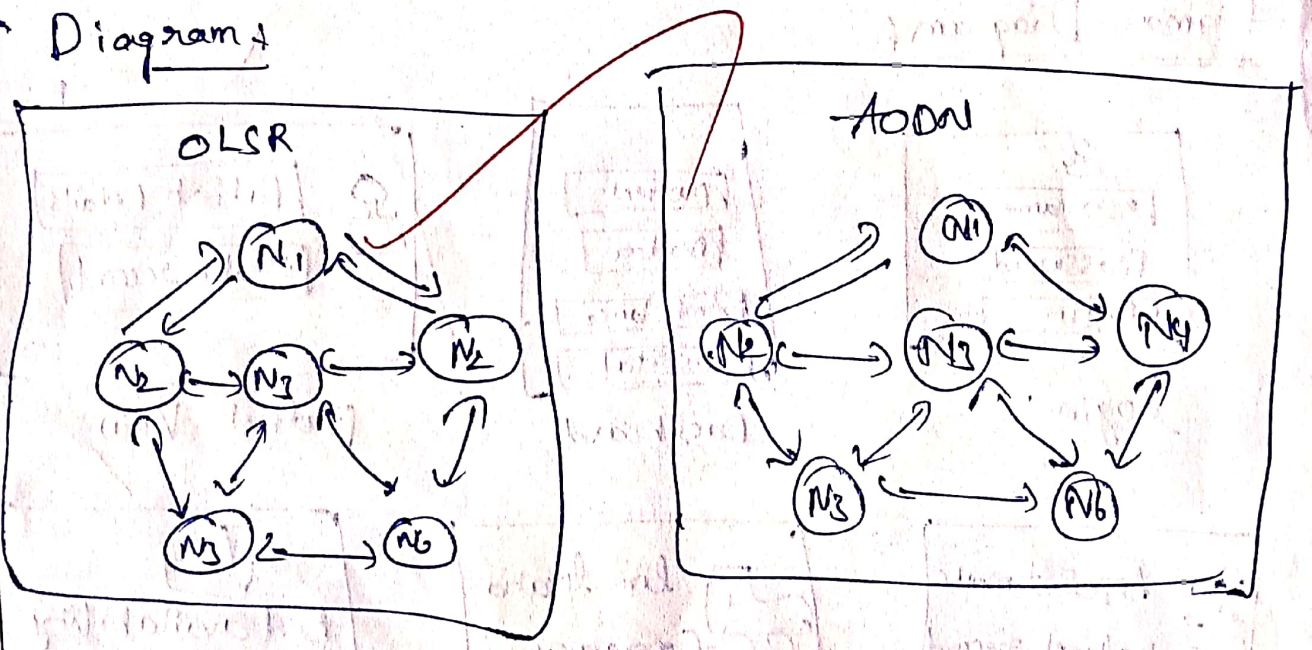

Result: Both network architecture were designed and compared using figma.

Aim: To visualize and compare OLSR and AODV routing protocols using figma.

Algorithm:

1. open figma and create a new file
2. create a OLSR frame
3. Add network nodes and loading arrows.
4. Show periodic resolting update.
5. Create the RREQ process.
6. Show the RREQ process.
7. Add a comparison of both perform.
8. preview the prototype.

* Diagram:

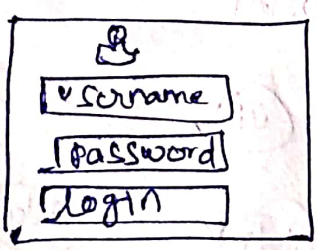

Result: The OLSR and AODV resolting process were visualisation and compared using figma.

4) Aim: To design a Smart Healthcare Mobile Ip application using figma.

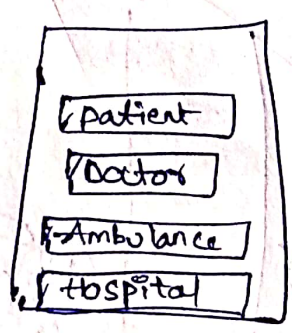

Algorithm:

1) open figma and create a new file.
2) Design the login Screen.
3) Create the health care dashboard.
4) Add patient and doctor screens.
5) Draw the mobile ip network.
6) Show network handoff.
7) Connect the screen using prototype mode.
8) Preview and test navigation.

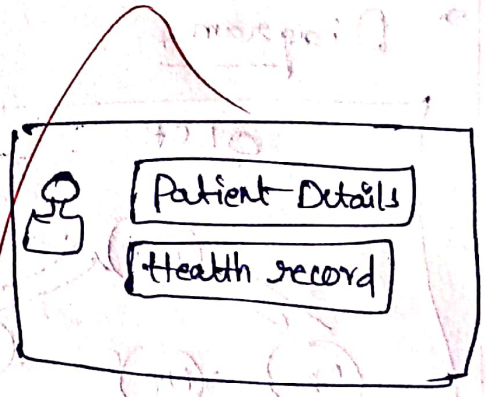

figma Diagram:

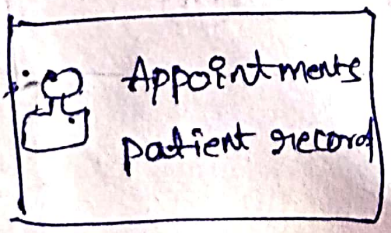

login.

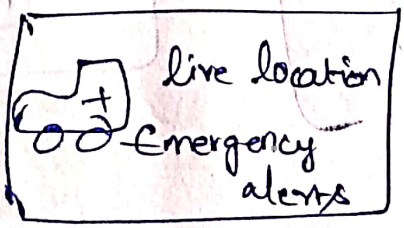

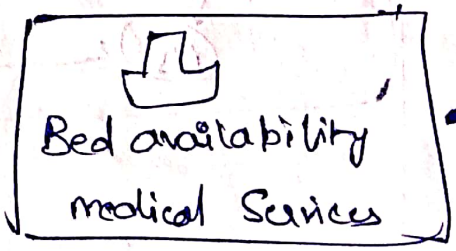

Dashboard

patient View

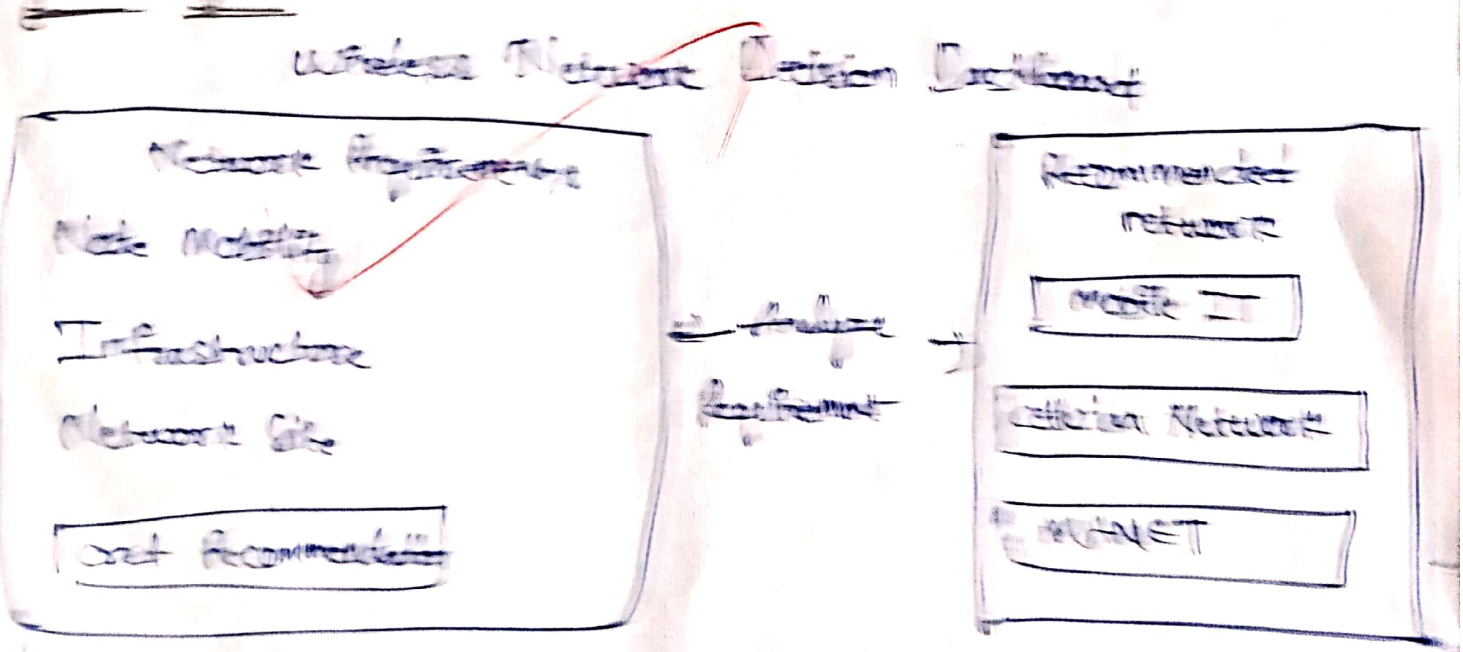

Result: A Smart Healthcare application prototype was designed to demonstrate mobile communication in healthcare Servey

Aim: To design a wireless network Decision Dashboard using figma.

Algorithm:

1) Open figma and create a new file.
2) Create the dashboard Screen
3) Create rectangular Boxes
4) Add individual node specific content
5) Design the recommended parameters.
6) Connect Screens using prototype mode.
7) Preview and verify the dashboard.

Figma Diagram:

Result: A wireless network decision dashboard was designed in figma to display suitable networking options based on the selected requirements.
